

June 10, 2024

#### **Key points:**

- European markets remained constructive last week, with the Stoxx 600 reaching an all-time intraday high. The Netherlands, Denmark, and Switzerland exhibited strong positive momentum and made fresh 52-week highs. Overall, we remain positive on the market but recommend monitoring distributions in the coming weeks following European elections this weekend, which show the rise of the far right. Political uncertainties could lead to a short-term pullback; for the Stoxx 600, watch the short-term supports at its 50-DMA (1.4% below today's price).
- Sectors closed mixed last week. Technology, Healthcare, and Consumer Staples led the gains, while Energy and Basic Material lagged the most. On our rotation graph, performance broadly shows fading short-term momentum among sectors. However, Consumer Staple was an outlier, with short-term momentum improving, while Technology is showing early signs of improvement after deteriorating abruptly for several weeks.
- Sector Score Cards Stocks of Interest (Top-rated names with best technical setups refer pages 9–20):
  - Consumer Disc./Retail: Inditex (IND.ES, FL constituent), Michelin (MCL.FR).
  - Consumer staple: Beiersdorf (BEIX.DE, FL constituent), Unilever (ULVR.GB), L'Oreal (OR@F.FR).
  - o **Financial**: Talanx (TLXX.DE, FL constituent), Swissquote (SQN.CH, FL constituent).
  - o **Health Care:** Camurus (CAMX.SE, FL constituent), Ipsen (IPN.FR).
  - Technology: ASML (AML.NL, FL constituent), Logitech (LOGN.CH), Elmos Semi. (ELGX.DE), Nemetschek (NEMX.DE, FL constituent).
- European Focus List update:
  - o Addition: Camurus (CAMX.SE), Talanx (TLXX.DE), and Terna Energy (TEN.GR).
  - o **Removal:** Bachem Holding (BANB.CH).

#### Prepared by:

While the Stoxx 600 (EXSA.DE) is trading near its all-time high, performance across sectors and countries is becoming increasingly uneven, indicating a lack of broad leadership in the region. With rising distribution over the past two weeks—a trend that could accelerate due to increasing political risk following the European elections—we believe a market pullback is likely.

Technically, the key support level to watch for the Stoxx 600 is its 50-day moving average (50-DMA). A break below this level would point to the next support around 500, aligning with April lows and suggesting a 4% downside risk.

Among the 16 indices we monitor in the region, the average number of distribution days has increased to 3.6, up from 2.2 two weeks ago. While indices in the Netherlands (OAMSTEOE), Denmark (ODKKFXIN), and Switzerland (OSWISSMI) have hit fresh 52-week highs, several key indices are facing mounting pressure:

- The French CAC-40 (OFRCAC40) remains the only index in a Rally Attempt. It broke its 100-DMA today on high volume after President Macron called for a snap election post-European vote.
- The German DAX 30 (ODAXINDX) and the UK FTSE (CUKX.GB) have accumulated five distribution days as of last Friday. Both indices are currently under pressure, trading below their 10 and 21-DMA and approaching their 50-DMA, respectively.

At the sector level, the risk is now clearly concentrated in Banks (EXV1.DE). The sector, which led until last week and showed an extended profile (trading 21% from pivot), is now facing pressure, particularly dragged down by French banks due to concerns about French public finances.

In this context, a rotation towards defensive sectors makes perfect sense and is already visible on our rotation chart, with Consumer Staple and Health Care showing improving short-term momentum. Technology is also showing early signs of improvement after deteriorating abruptly for several weeks.

Staples and Healthcare look particularly interesting as both sectors trade at extreme oversold levels when looking at a rolling 1-year price performance vs. the Stoxx 600.

#### **European Focus List Update**

#### **New Additions:**

- Camurus (CAMX.SE; CAMX SS): Buy Camurus as the stock broke out of
  a stage-three 20-week consolidation base into new highs. It
  is benefiting from a huge treatment gap as only 18% patients receive
  opioid treatments. Revenue in 2025 is expected to grow more than
  60%, with triple-digit y/y earnings growth rate, due to increasing
  partnerships for distribution coupled with added indications.
- Talanx (TLXX.DE; TLX GR): We added Talanx to our Developed Markets Focus List as the stock broke out to its all-time high from a stage-two nine-week flat base. It is actionable in the range of €74.2–77.9. Talanx is the third largest insurance group in Germany. Its primary insurance business witnessed strong growth, driven by acquisition. It became one of the largest insurance providers in Latin America after acquiring Liberty Mutual Insurance in May 2023 for €1.4B. It expects net profit CAGR to accelerate to 17% in FY22–FY25 compared with a previous CAGR outlook of 11%, driven by growth in the primary insurance segment.
- Terna Energy (TEN.GR; TENERGY GA): We added Terna Energy to our Emerging Markets Focus List as the stock broke out of a stage-one cupwith-handle base. Terna Energy is the largest renewable energy producer in Greece. Leadership in a highly favorable market, strong capacity expansion plans, and diversification beyond wind power are its key growth catalysts.

#### Removals:

• Bachem Holding (BANB.CH; BANB SW): We removed Bachem Holding from our Developed Market Focus List after the stock

WILLIAM O'NEIL+CO.

breached its 50-DMA on heavy volume. Long-term fundamental story remains intact but given the poor technical action, we recommend that investors exit positions.

### How To Read The Sector Card

## **European Focus List**

O'Neil Recommendations

The **European Focus List (EFL)** is a proprietary list of long ideas that fit the fundamental and technical criteria of the O'Neil Methodology.

## **Outperforming**

Stocks breaking out from pivot

We recommend buying stocks at the **breakout level**. A breakout is a price movement of the security through an identified level of resistance (pivot point) after forming a consolidation base. Our proprietary chart patterns are based on over 50 years of our active research into the behavior of equities.

## Laggards

Stocks in which investors are losing interest

**Laggards** are stocks showing technical weakness. We believe these stocks are laggards relative to their own domestic markets and, if owned, need to be reviewed carefully as they may be vulnerable to further downside risk and underperformance.

## **Top Rated**

Stocks displaying the best Composite rating

The Composite Rating combines the EPS Rank, Relative Strength Rating, Industry Group Rank, SMR Rating, Accumulation/Distribution Rating, and the stock's percent off its 52-week high. More weight is placed on EPS Rank and Relative Strength Ratings. The resulting rating of technical and fundamental factors is compared against all other stocks in the trading country and assigned a rating from 1 to 99, with 99 being the best. A rating of 90 means the stock has outperformed 90% of all other stocks.

## **Early Basing**

Stocks trading near pivot on improving technical characteristics

**Stock near pivot point** (last line of resistance) with improving technical characteristics and above average fundamental profile based on O'Neil proprietary ratings and rankings.

## **Basic Material**
