European Focus List

O'Neil Recommendations

The **European Focus List (EFL)** is a proprietary list of long ideas that fit the fundamental and technical criteria of the O'Neil Methodology.

Top Rated

Stocks displaying the best Composite rating

The **Composite Rating** combines the EPS Rank, Relative Strength Rating, Industry Group Rank, SMR Rating, Accumulation/Distribution Rating, and the stock's percent off its 52-week high. More weight is placed on EPS Rank and Relative Strength Ratings. The resulting rating of technical and fundamental factors is compared against all other stocks in the trading country and assigned a rating from 1 to 99, with 99 being the best. A rating of 90 means the stock has outperformed 90% of all other stocks.

Outperforming

Stocks breaking out from consolidation

We recommend buying stocks at the **breakout level**. A breakout is a price movement of the security through an identified level of resistance (pivot point) after forming a consolidation base. Our proprietary chart patterns are based on over 50 years of our

Early Basing

Stocks trading near pivot

Stock near pivot point (last line of resistance) with improving technical characteristics and above average fundamental profile based on O'Neil proprietary ratings and rankings.

Laggards

Stocks below 200-DMA + 50-DMA in a downtrend

Laggards are stocks showing technical weakness. We believe these stocks are laggards relative to their own domestic markets and, if owned, need to be reviewed carefully as they may be vulnerable to further downside risk and underperformance.

U.S. FOCUS LIST & GLOBAL FOCUS LISTS DEVELOPED, EMERGING & FRONTIER MARKETS

The U.S. Focus List and Global Focus List for Developed, Emerging, and Frontier Markets seek to identify equity ideas for further research for institutional investors. Investors, before making investment decisions, should review and evaluate additional information, such as a company's SEC filings, business model, industry fundamentals, management team, and products and services.

EXPLANATION OF PERFORMANCE CHARTS FOR U.S. FOCUS LIST & GLOBAL FOCUS LISTS

William O'Neil + Co. Incorporated is an SEC Registered Investment Adviser. Employees of William O'Neil + Company and its affiliates may now or in the future have positions in securities mentioned in this communication. Our content should not be relied upon as the sole factor in determining whether to buy, sell, or hold a stock. For important information about reports, our business, and legal notices (including our Privacy Policy), please go to williamoneil.com/legal.

Performance results do not represent actual trading, and may not reflect the impact that material economic and market factors might have had on the investment decision-making process if actually managing client money. There is substantial speculative risk in most international stocks. Past performance is not necessarily an indication of future performance. Performance computations for the U.S. Focus List and Global Focus Lists reflect a time weighted rate of return. All holdings are rebalanced to equal dollar amounts daily. Dividends are not considered in computations. Commissions used in calculations are 50 basis points for stocks in the Global Focus List Emerging Markets and 20 basis points for stocks in the Global Focus List Developed Markets. Percent gains and losses are calculated for all issues that remain on the "Buy Recommendations" at the end of the week. For issues that were added to the "Buy Recommendations" intra-week, the basis used to calculate the percent change is the price noted when the issue appeared as a "Buy Recommendation" in both the U.S. Focus List or Global Focus List Confidential Alerts. For issues that were "Removed" intra-week, the selling price used to calculate the percent change is the price noted when the issue appeared as "Removed" in the U.S. Focus List or the Global Focus List Confidential Alerts. The iShares MSCI EAFE Index Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in the European, Australasian and Far Eastern markets, as measured by the MSCI EAFE Index.

The iShares MSCI Emerging Markets Index Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in emerging markets, as represented by the MSCI Emerging Markets Index.

The benchmark is the S&P 500 Index, which is a market-capitalization weighted index containing the 500 most widely held companies (400 industrial, 20 transportation, 40 utility and 40 financial companies) chosen with respect to market size, liquidity, and industry. The volatility of the S&P 500 Index may be materially different from that of the strategy depicted, and the holdings in the strategy may differ significantly from the securities that comprise the S&P 500 Index. The S&P 500 Index is calculated on a total return basis with dividends reinvested and is not assessed a management fee.
